The Sub-Study Group on Movement Analysis

2024

12 people attended the onsite meeting in Izmir 27 July, 1 person attended online (Raymundo Ruiz). Several came afterwards to call their interest too. Approx 60 (2021) is on the list of interested in the substudy group

Janos Fügedi had prior to our symposium withdrawn from his position as co-chair. He wishes to continue as a member of the group

The meeting approved Raymundo Ruiz as the new co-chair/secretary together with Siri Mæland.

Previous work and themes in the sub-study group:
- The book "Dance structures",
-Themes on music-dance relationships and dynamics, where svikt and centre of weight/gravity was explored

Two suggestions for further work:
-Teaching system to improvisation
-Dynamics, groove in the body – dance groove (proposed by Colin Quigley). Music has studied groove, what is a dance groove? What is dance groove, or should we call it something else?

Theme two was decided to work further on.
To start with bibliography – what has been already written in accordance to this theme.
Among others these was mentioned:
Judy Van Zile's article about feeling the body was mentioned, the dynamics of svikt, and the work with dancicality of a Serbian colleague and Siri Mæland.

It was decided that Raymundo and Siri would invite for an online reading circle during the autumn.

The plan is a reading circle between 28th of October and 12th of November.

Siri Mæland
